Re: Survey Crews Along Little Roche-a-Cri on February 13, 2018

Dear Municipality:

As part of the Friendship Dam compliance with DNR directives, Ayres Associates' survey crew plans to survey bridges along the Little Roche-a-cri from STH 13 to CTH Z and survey spot elevations for about 30 homes along the river in this area. If you have local contacts, please notify them that on February 13, a survey crew will be accessing public and private property to pick up a single survey point used to determine how high the home's lowest livable level sits above the river. Per State Statute 59.73, survey crews do not need landowner permission to collect this survey point, but we do strive to give local municipalities advance warning to avoid surprising landowners. Please feel free to call me if you have any questions.

Sincerely,

Ayres Associates Inc
